Friendly Fire On or Off?
Posted by VoGon - 09 Mar 2010 16:27

_____

Ok guys, there has been some talk about this but we decided to poll it.

Should FF be on or off on server?

I personally feel it should be on, it gives much more realism to the game, also, people with tanks and helicopters or mortar strikes can just spam away an area without caring for who is there.

I think FF adds a whole different approach to the game. It makes you more aware of your team mates and less "trigger happy". Also most of the servers I see have it on.

I would like to ask that when you vote you post your reasons for choosing it, and loosing points because of a team kill is not a reason! 😊
