

Funny replays go here

Posted by liger - 15 Aug 2010 15:14

we either need a section for just replays or maybe create a few topics with funny, zerg, toss and post there

anyways funny replay

www.gosugamers.net/starcraft2/replays/35406" onclick=">window.open(this.href);return false;

We could (if Tunes allows ofc) set up a web space to upload them to, but it will take some time to get it ready.

How big in size are replays normally?

The "biggest" replay I have is a stunning 210Kb 🤔

Unless u want to make it a feature (do we have enough space?) we can just use this site

sc2.replayers.com" onclick="window.open(this.href);return false;

There is plenty of space... now just need a component or something to get it going.

JomSocial has video built in - we just need to allow it I think and maybe get the settings right on it? I'll PM you Tunes with the details and we can see if it works ok ?

Edit: I see it's not a video per-se but an in game file (ashame in a way).

We can find a download repository to handle this. I have one in mind, and it may already be installed.
