i hope that admins will soon add some new races and if someone would want to play on the private races what to do because m3ntoz is in the clan and he told me that he cant use the private races

private races are ment to be private ... and for now im a community member, not a clan member or a admin so that's kinda normal.

Clan members get nothing more than a community member and tbh there's not much difference theses days. Some admins have access to the private races. however they are private due to been a little or very overpowered. once the January exams are over I'm hopingooky the scripting legend will reappear with some new races. oh and the mod creates have some fixes sooooooon
