Posted by Kaotik - 21 May 2011 13:23

Steam Name: Erain666

Steam ID: your steam ID: STEAM_0:1:22141569

Reasons for joining: Aw, I suck at this, well here goes nothing.

I want to join TWK is basicly I love the TWK tag and it's server that I srsly enjoy playing since a long while, wich letted me stop playing css from 1 month to a year. ZOMG, I srsly hate these type of questions sooooo hard, never been a forumfreak xD

Servers where you play: TWK wcs server, some dutch Deathmatch server, a GG DM server(will have 2 switch 2 TWKs GG DM server, but always been CBA to look up the ip xD)

Will bump my steamID in a min.

Gz,

Kaotik
