

Scathe's application to join TWKgaming community!

Posted by Scathe - 08 Jul 2011 14:34

Hiya guys!!

Well the time has come where I have decided to try and be part of your community. For those who don't know me! I'm Matt aka Scathe, I have been playing cs since the beginning of time which you can see from my steam ID as this is still my original account. Used to play very competitively back in the day winning premier league of ED. Got tired of everything being so competetive and quit for a good 3 and a half years.

Since then im back and playing on your servers, as I purely just wanna have fun these days. (plus im getting old and losing my skill!)

Steam name: Scathe (rarely Warsong or Satedan)

Steam ID: 676036

Reasons for joining: Quite frankly, I love the atmosphere on your servers, love gaming with its members, I've made alot of friends within the community itself and others on the servers. Also knowing that the community as a whole supports its regular members is a good sign within.

Servers where I play: Well as you can see from my stats page mainly on twk wcs server, though I also frequent the twk gg dm server and your twk surf server! (though I am rubbish at surfing) Only time I go elsewhere is when your servers are down, mostly to the insanely annoying steam updates.

If you would like to pick my brains about anything else, feel free to ask and I will do my best to answer!

Thanks guys! 🍌

Finally Scathe I thought you would never make an application.

I guess you getting old means everything you do takes twice the time before it happens 🤔

Anyhow good luck with your application. Would be great to have you onboard 🤝
