

Hello, I would like to join TwkGaming please?

Posted by mysonjoey - 19 Sep 2011 17:41

Steam Name: mysonjoey

Steam ID: roplat

Reasons for joining: As a general friend for the clan for a while, it seemed fit for me to at least apply for the clan. I know a few members, and i'm friends with a couple. I want to join simply to say i'm a member, it's been a while since I was in a gaming group and joining would really help with my various gaming interests such as playing coop games easily, if you know what I mean, as it is often hard to gather a group for less well known and popluar games. I sadly do not play CSS often, but I do actively play minecraft and would be interested in siging up to your server.

Servers where you play: I do not currently play on any of the CSS servers nor the minecraft, but I do actively join the teamspeak server to play starcraft with Substick and ReacT
