

## how about a survival server with 2 factions

Posted by AL Azif - 05 Feb 2011 20:57

---

So i came up with this idea for minecraft.

what if we get a minecraft server with survival without cheats (so where you have to work for everything). and get 2 factions going that can fight with each other. like some kind of castle wars.

both factions can make a castle and later on defend it. where everybody can use what they gained trough playing the game. so that we can have castle sieges and that everybody can just equip their armor and swords/bows and get this little war going 😊

so it would be something like.

nobody is allowed to pvp when it's light. so it's a bit calm and you can chop your tree in peace.

underground pvp is always allowed. so mining is a bit more intense since you could get ganked at every moment.

castle sieges 1ns a week/2 weeks.

probably forgot something but will just post that later ^^
