Sooo, me and my friends are looking for a little server, were we can build our city..

And I was wondering if anyone here in TWK could take me and my two friends with you in a server.

Hello mate and thanks for the request, rights and whitelist sorted out to you, Builder class, join in and build freely

You can use /item to spawn items in the inventory (item name or id)

There a few kits, try /kit for a list, you can also use /sethome and /home, as well as /spawn.

Please do behave on the server, I monitor it most of the time however I'm not really there.
