

Seeds

With the new minecraft update out for a while, I'm sure we've all been testing it out and have found some epic seeds to show.

If this could get made into a sub-forum even better so we could have a topic for each epic seed!

For now though, post the epic seeds you've found/heard of (I'll leave my fave for if there's a sub-forum or make a thread of it's own because it's THAT EPIC 🤩)

Ones I've been told about (remember they are case sensitive):

Glacier

694228

floating islands

Dungeons and Dragons

Terrestrial

10110101

and one final one:

That's right I found my name to be a pretty basic server at first, but some pretty awesome things on there!

Go to -6, 65, -169 for the smallest biome EVER in water.
