I know you aimed it at Tunes but I might as well answer it for you 🤔

Go to www.minecraft.net

You need to make an account on that site and then buy the game, I think its about £15 right now.

Pretty simple, give me your username and after I confirm your rights, just join on mc.twkgaming.com and have some fun on our free build server.

Well folks, did an update yesterday during the night, people complained today they lost a few builds during the night, the server was crashed before I start to update the overviewer, for that I'm sorry but there is nothing really I can do, since the chunks weren't saved and they did no go into the 6 hour lapse backups.

The server is running a very unstable release atm (thanks Notch) and also an unstable Bukkit mod for this MC SMP version.

Sometimes things will get broken...

Cheers!

Overviewer map got updated today.

I just wonder who the heck done the quick running exploration thingie... gotta edit that map and solve a few problems.. geez.

Today or tomorrow I may stop the server for around two hours, need to edit a few things on the map that cannot be edited while online, don't worry, no creations will go, and a few I messed up a few days ago may appear again.

Well folks, this thing is getting biiiiig, 14Gb to upload every day, is taking a bit of time, so, from now on, I'll update the Overviewer around twice a week.

Updated during this night.
