Hello,

I just visited a server where they had like a "starter" zone for guests and than a room with 3 portals that teleported you to different worlds like survival/art/Battles and those 3 areas also got in front of your name once you teleported to that area like there is twkadmin on the server now. I think this would also be a great idea for our server so people can do any kind of thing mc has to over instead than only building.

M3ntoz

More MC servers to come m3ntoz 🤔
Just waiting for the tunes to start a playing

That is actually a really good idea in my opinion, it would save the cost a lot 🤔

really nice idea m3ntoz! 🤔
, I was also thinking about a rpg mod for survival, it gives u skills to increase lets say the dropchance on getting a extra cobblestone stone block if ur mining lvl increases... or get extra roses from herbalism if u pick them 🤔

WOOT!! 🥳
, ill defo play mc more with that stuff installed, btw there's also something called the hunger mod, it basicly requires u to eat , drink etc once a day or ull die of hunger... im not sure if this is a simple singleplayer mod or also a multiplayer but its worth looking into just to make survival whell... more survival 🥳

Yes the hunger mod is a multiplayer mod too, seen a few servers with it, but haven't really played it much (since the servers it was on were crap -_-)
