

Minecraft server updated to 1.6.5

Posted by Tunes - 28 May 2011 22:49

Well, its there!

Lets see how it behaves!!

Please post problems, bugs, ingame features here!

Thanks.

First 5 minutes are calm 😊
at least chunks load and looks like "everything" is working.

For me the server works fine, sadly Zombe fly mod doesnt as it is for 1.6.4 =(

Looks like there will be no big projects for me in minecraft for a while..

yay tunes 😊
all seems gd, except the flymod thing so far 😊

YAY YAY YAY!!!!

just updated today:

www.minecraftforum.net/topic/91055-v165-...ods-v423a-upd-29may/

flying mod works ^^

flymods nw wrkin but i cant connect to the server 😞

edit all wrkin now, plsu the new update means my skin isnt constantly taken away 😊
, but thats the only visible upside so far

The server is still very unstable and sometimes it loose its mind, having me to restart it again, if that happens, I'll notice and restart asap.

Notice a few problems with trees... weird thing, when I have the time, I'll see what I can do.

Cheers

Can't get on at all. Get this error:

Connection lost

Internal exception: java.net.SocketTimeoutException: Read timed out

And also, but probably out of your hands, is The Nether causing a disconnection when you go back to the normal world (sometimes) and the chunks also take ages to load, and while it's loading the two worlds seem to merge into one (might just be me, but still a bug none-the-less)

a few days ago when I connected to the server I spawned and I can see a few blocks but if I step off those blocks then I fell to my death and respawn on the blocks. (every other block is invisible)

Today when I tried to connect it just said "Logging In..." and didnt let me connect, after about 1 minute I get the error "Read Timed Out";

Thanks
