Notch	oh Notch	Another	update	into	1.6.6
Posted by Tu	unes - 31 May 2	011 15:29	•		

This is awkward, we all know its a beta, alpha, development, work in progress, whatever you want to call it, but spending most of my time updating mods, plugins and the darned core every 2 days is troublesome, yet, I must do it.

Our server is atm running 1.6.5, bukkit 816 was released just this night to compat with 1.6.5 and Notch deals another punch into de 1.6.6, so, folks and twk server players, don't update yet your clients, I will update the server ONLY with a compat bukkit release.
