Yesterday I found a part of the map near froggy's farm on fire too, but did not found the lava that put
everything on fire... didn't manage to find who did anyway...

going to take a short walk in there as I'm at work.

Thanks for reporting

BTW, the commands to bigbrother are /bb stick 1 to look into blocks and /bb stick 2 to see who put a
lava or water block

Stonebolt bites the dust with a ban in the minecraft server ...

By the logs, he maybe has done more damage somewhere else, now it should be solved...

Thanks Gimp (Next time, only put a sign next to the location and not the whole glass box around te thing
)
