

Ye Olde Servere Historye... E...

Posted by Zorninphel - 03 Jul 2011 02:39

Just browsing through the access requests because it's half three in the morning and I'm bored because I spent all of today sitting in a car. Anyway, I got wondering, what's happened on the server? What are the most memorable things you can remember doing/happening?

Cheers

Zorn.

the most memorable thing i ever made was a giant penis that killed voodoo's minecraft man 🤪
, an zom go to sleep!

Zombie testing facility? Don't you mean pegasus testing facility?

HAH! yes. for those who dont know we lured a certain pegasus (you all know him) into gimps testing
facility. in that facility, we tested him 🤪

the tests were enlightening and painful. but not painful for me or gimp 🤪

yes the tests were very productive.

we have learned that pegasus's originally do not like being dropped from high heights into lava pits but
when the test is repeated they grow wings and fly 🤪

we have also learned that their mental abilities are fairly high and were able to pass most tests

but during the final test we discovered that the pegasus reacts poorly when trapped in a room filled with
zombies, they die. 🤪

we have learned that pegasus's originally do not like being dropped from high heights into lava pits but when the test is repeated they grow wings and fly 🤔

we have also learned that their mental abilities are fairly high and were able to pass most tests

but during the final test we discovered that the pegasus reacts poorly when trapped in a room filled with zombies, they die. 🤔

A Pegasus growing wings? You need to research your mythical creatures Mr. 🤔
