

Minecraft 1.8 "leaked" pre-release

Posted by Chifilly - 09 Sep 2011 23:56

The pre-release of 1.8 has been "leaked" and you can download it (links below). I say "leaked" with quotes because Jeb has authorised it and is allowing the distribution of it, however it was originally leaked by one of the testing groups. Some people think it's a publicity thing, or they're saying it's "leaked" but it's really so they can treat this as a bug testing stage and everyone is a beta tester. All I know is that you can play 1.8 now, without getting your ass banned from Minecraft.

You can find the official thread for it [here](#) .

You can download the client [here](#) , and the server [here](#) .

Enjoy 😊

And BTW, I can say FIRST! and troll the shit out of me, cause I was the first to post the link to new jar file 😊

Servers are also updated to the new release in case someone want to test it out!
