

Painterly pack creator

Posted by Tunes - 26 Sep 2011 10:54

Came across this today, you can customize the pack including some mods.

painterlypack.net/index.html

cant believe you havnt seen this one before 🤔
, used it for ages now but i want something more HDish like 128x128 or 512x512 🤔

I still think painterly is awesome 🤔
looks so nice

I know this for quite a long time but only today passed over it again and posted, I usually use the default texture, as my laptop is kinda old to hold anything more than that...

ah right that explains and meh default textures hurt my eyes 🙄
but I get what you mean when I (try) to use a 512x512 pack minecraft wont run itll give me a message
that java has run out of memory or something like that 🙄
; already tried different methods but I guess I am just cant handle it 🙄
