

I want this mod in SMP..

Posted by Johannicus - 27 Sep 2011 17:19

if it would work 😊
Or should I say mods?

I saw this 😊
was awesome

This is awesome!

EDIT: After reading into it more, if this mod was added it does seem like you may as well include several other mods like the industrialcraft and Forge mods (and if you get forge you may as well get better than wolves)

Not sure how this would effect the server or if everyone playing the server would then need those mods but it might slow the server down exponentially

I watched the vid showing what was coming for 1.8.1 and my god I could barely understand a word the guy said! This does this which leads to that which is powered by that. That is gained by converting this into that into that which is done by this which needs this. To get this you... etc etc etc 🙄

Hey, was kinda busy the last days, well, I've been checking this mod, and its almost ready for 1.8.1 AND requires the client mod as well the server mod.

I don't have any problems in giving this mod a spin, BUT, I wonder what people without the client mod will see...

I was looking round for a server with this mod and you know what? The only one I found you have to actually pay to get whitelisted so I wasn't going to do that! I will not download the clients for buildcraft until a day or two after we've got something built, see what it looks like 🙄
