

Minecraft Update 1.1

Posted by Space_Cowboy0001 - 12 Jan 2012 18:39

Ok well just now Notch released the new Minecraft update 1.1. It look spretty cool they added a new recipe for golden apples (don't know what that is yet), made bows enchantable, and made spawner eggs for creative mode only where u take which one u want and left click it on the ground and it spawns that kind of mob 😊

FYI, it was Jeb who released it 😊

And it does look pretty interesting. Also, Sheep eat grass and grow back their wool

enchantable bows sound awsome 😊
hope the update doesn't mess with stuff though

1. Why do you need to wait for CB 1.1? if you already updated, just downgrade again..

2. I'd imagine when you start a new world there are the options "survival, creative, hardcore" I think it'd be added there possibly.

You create a new world, and it's under World Options (or whatever the button is) and there's "Generate Structures" thing, then another option next to it
