Wow amazing posts creeper. I will totally take a long deep though about this but while i do that how about u stop being a dirty troll on the server. All u do is whine about how gimp or me or frogs is abusing there power whenever we don't do something in your favor. Also those screenshots you took are really bad be cause i put a * in front of every cus i said so it wouldn't be a cus word, and in one of them u got your self swearing so good job 😊
! Next thing is that even though you and max don't say it you guys act like you should be mods and i should not be one. But the reason I'm one and your not is because: 1.Im actually trusted by most players on the server including tunes and all the mods. 2. I don't thrive on the misery of others like you do. 3.Ive played on the server for like almost as long as Gimp and i have no idea about voodoo (which is like 7 or 8 months i think.) So I hope next time you try to complain about me get good evidence and get more people to like you (Your Karma is a higher negative number than ur posts is positive :p). O ya didn't mean for this 2 be a rage comment just thought i would tell the truth.

Well Space, Nice rage comment btw. And, I don't want you to be mod so why add that? That's the whole reason of the thread. And yeah I do like to mess things up, that's the point of the server. And I have no interest in being a mod. !👉

Called trolling gimp... also, where space said "*ape your face" it was because he was explaining something he said in the past (which I already raged at him about).

So, Everyone stop being silly 🤪

Why are you always calling me a bad mod then? And why are you and max always allying me a noob?

And its not called messing up when u make lots of people rage quit from the server.

Why do you keep teasing space, stop being a jerk to him and space stop being an idiot to him(No offence)

Also, what was the argument about xlad about?

Well, from an impartial view (because I haven't been on the MC server much), I would say that Creeper is just being a bit of an ass towards Space. That's my view anyway
