1.2
Posted by Chifilly - 29 Feb 2012 14:15

_____

Jeb tweeted earlier that he's planning to release Minecraft 1.2 tomorrow! (clicky)

So, how's the updating gonna work? :/

_____

I have no idea and this one caught me with my pants down.

Well, the usual will happen, I won't be changing the map (probably won't change anymore), wait for a bukkit release, update, update plugins, the usual stuff...

Lot's of work as usual and facepalming

_____

Awesome 1.2
That means i can start building stuff so ridiculous, its silly

_____

If you ask me they shouldn't tell what will they add in the update before they actaully release it...

It spoils everything :S

I won't even read about it, I'll just deal with it when it comes out, getting the server taken care and prolly add the creative (this was one of the reasons I kept creative offline) will take a toll on my time and I won't guarantee when the survival will come up again.

However, I won't regen the map, keep this one, it's pretty 🙂

_____

Well, Notch (I think it was Notch anyway... can't remember xD) tweeted that Bukkit has been updated to 1.2 (which <u>was</u> a step towards an update) but now Minecraft has been updated to 1.2.2 because Jeb screwed something up to do with trees 😳
