

Inventory Resets

Posted by Space_Cowboy0001 - 18 Mar 2012 13:29

Hey Guys, just wanted to talk about the inventory on minecraft. Just Recently Garner123 and I were playing in our nether base. He logs out due to some little lag and it reverts all the stuff he did for the current log in and goes to the last time he was on and uploads that save file to his inventory (basically erasing everything he's done for the past day). I try it out and it does the same thing. Not sure what it is but if u could fix it that would be great 🙄

I noticed that too. The last time I was on, I was on your mob tower, I was nosying around spawn and logged out there because I had a bit of lag, logged back on and I was back on top of your mob tower with my inventory reset to when I was there

some virtualchests were damaged, powerfire, yoaroon (i think) techbenett and garner, will fix them asap.

Soz mates, sometimes shaite happens.

No, that's not it. I've been very active. Tunes got us fixed up (for the most part).
