Well, it's up @ mcc.twkgaming.com

Dynmap mcc.twkgaming.com:8123/#

Only current mods and xmods are regged to play there, atm don't have any time to fiddle with regging methods as so, it's kinda super private server 😊

Also, I'm fixing perm atm and a few more settings, so if something does not work, please notify me

I'll post a list of plugins and their commands soon.

It's amazing! How did you accomplish all of that with out any griefing?

Very impressive. Glad I got to snoop around. 😊

Lava yes and no flow to regular players, tnt is server wide disabled for everyone and water flow is also disabled.

worldguard is there to, I'm still fiddling with lots of perms and stuff, as I cannot copy the one I have in the survival, since they are really different.
