

The New Project

Posted by Shadeyz - 30 Apr 2012 22:25

Some of you may have seen my previous post on mount Hyjal and how its now on sale 🤔, we are selling it to get craft so we can claim our first mega project, It Will be a desert based castle built in the style of the Eiffel tower, We are currently working on massing amounts of sandstone 🤔

I will keep you guys updated on its progress but i will avoid making it as spammed as the previous 🤔

This is the mine we are using to get sandstone, its gonna be about 5 times bigger when the project is done.

The project itself will have the same style and aesthetics as this building, but it will be more castle like 🤔

=====
