

Minecraft server 1.3.1

Posted by Tunes - 02 Aug 2012 01:29

Well, I've started a vanilla server, no plugins, no nothing, as such

NO COMPLAINTS

"-ehhh, that guy grifed me, buahhhh"

Play, have fun, explore the update with people around.

Cheers!

As usual, connect to

Hey! Just a few questions that were bouncing around the server today.

1. Will the server revert to the old server pre-1.3, or will we be starting a completely new one?
2. Could you transfer our characters we're working on now to the server when Bukkit updates?
3. (kinda goes with question 1) Will this server that is currently running be deleted?

Thanks in advance.

1. Pretty sure 1.3
2. Rather have a fresh start from 1.3
3. Probably 🐸

All these answers are a subject to change by tunes lol

Parts new and parts 1.2.5, main character and play map are reset, the current one will be deleted.

I don't want to be "that guy" but is there ANY way at all I could persuade you to transfer the character data from this current map to the new on once bukkit is updated?

I would understand if player data is reset. It's just "stuff",. But I would like to keep what I have on me. Thanks.
