

Is is just me?

Posted by NeoCopyman - 13 Aug 2012 18:48

I've been getting a connection lost error while trying to log for the past couple of hours. I've force update, restarted my computer, and I still get the error. I am able to log into other servers, so I'm wondering if its just me that can't log in.

Makes me feel a little better. I've been trying since 11:30 my time here in Texas. I was on until 7 in the morning and yet 4 hours later I can't get in. T.T

Working fine for me. It did happen earlier though. Might just need to leave it for a bit and try again later

It fixed it self, or maybe an admin fixed it, Who knows? We can play minecraft again. 🤖
