

Tonight's server lag issues and whitelist decision

Posted by iMattR - 21 Aug 2012 21:59

I'm just writing a quick public post to inform you all that the TWK Minecraft Survival server has been **temporarily**

whitelisted until the lag issues reside, upon decision by voodoo911. We're not too sure what's caused the lag, but we'll take a look and keep you all informed.

Please refrain from posting about the lag or the server being whitelisted, or moaning about it in the server chat (when it's back up and running).

Okay, for anyone that checks this post, after some time of the server being White-Listed the lag had seemed to have calmed down, I've removed the White-List and you guys can play as normal.

As of now I am unsure on what caused the insane lag, but it appears to be fixed now.

Thank you for your cooperation.
