Do you guys also have such an extreme downtime for the Minecraft-Login?

I nearly always get this message when I try to log in:

"sorry but we couldn't connect to our servers.

Please make sure that you are online and that Minecraft is not blocked."

I never had any issues with logging in, but this site also says that the login is not working when i get that error: xpaw.ru/mcstatus/

So I am not sure about if it's caused by my Internet, or Minecraft-login itself.

Minecraft logins are sometimes a bit wasted, I tried yesterday to change my pass and it was a no-go for around 5 hours...
