

Herobrine Chime sound

Posted by Minecraftwyatt01 - 12 Jan 2013 01:11

Could herobrine be stalking Gracie? In her base, by a cave she heard the chimes! Could it really be herobrine? IF anyone has heard these chimes, Herobrine may be closer then you think!!!

No, it's just Minecraftwyatt trying to be a bad troll, causing gracie to spam chat with "Herobrine" eventually causing me to mute her and get very close to muting him. Fun times in Minecraft

Added some new pictures that I could not show before. Now there is more proof. Anyone that knows a lot about Herobrine will know what these pictures mean.

Those pictures mean that someone can place grass on dirt, someone knows how to use signs, someone can dig at very low height levels and place redstone torches -_-

Herobrine doesn't exist. End of. Also, locking the thread to prevent any more unnecessary bumping
