Is the server down? I can't seem to join. I get an "End of stream" error

Yes it was 😞
last night I was busy and didn't notice.

Dead again 😞

Also, a quick question to you Tunes. Do you know the experience points and stuff, I was wondering if it was saved on a MySQL database, and whether you would give me some login details for that specific table (just for reading, nothing else) and the columns used so I could make a webpage that shows everyones levels? Just a bit of fun, and quite useful 😊

EDIT: Here's the link to the page that will have it on ([link](#)) it's just a template at the moment. If I get permission to do the page and get the login information, it will display everything on there
