ouch, that should hurt 🙄

i agree with peanut its the only possilbe and logical idea, but strange to press 2 keys at the same time 🤖 with one elbow or to press the whole time at first t t and then enter accidentally 🤖

1. The other guy didn't get unbanned as far as I know.
2. After spamming like 5 messages how did you not realise 'oh, my elbow is on my keyboard'
3. Why do you think that repeatedly asking to be unbanned will not help in any way?
