Hey tunes did u install a new group plugin because it seems most regulars on the server have been moved o this Addict2

class and we don't have the usual permissions such as /spawn etc... if u could fix that it would be great.

Tunes, the plugin that you installed that is supposed to automatically give rights after 24 hours has bugged out..

After 1 minute of game play it turns EVERYONE, even moderators into a "Addict2" which have no rights.

This means anyone that joins the server loses whatever rights that they used to have after 1 Min of game play.
