

The desert near spawn

Posted by Gimp - 14 Mar 2012 15:09

hey tunes, when you have the time could you regenerate the desert? shes err, not looking her best these days 🙄

Well all know gimp is gay enough to have a mac

And I can't regen the map, in fact I did it this morning and regened into an ocean 🙄
due to the changes in the generator.

However, I'm thinking into multiworld and getting a new map into the server... will look into it asap.
maybe tonight if the server is empty enough for a few restarts.

dont have a mac by choice 🙄
my laptop broke and it was either accept mac or buy my own one 🙄

an:kk, ty anyway 🙄
if i can be bothered i might go ape with WE and try make it pretty again.

Also, it turns out regular players can use a wooden pickaxe for big brother 🙄

Haven't you herd of sand machines?

I know tunes loves them 🐸

Sure froggy 🐸
love them like yesterdays crap 🐸

Finally finished my 4x4 pistn door at spawn right next to the redstone building if u wana check it out. Also Ty tunes for giving me creative and a spot to work at. Also any 1 who tried out the piston door wait 10 seconds between hit or it will bug due to redstone lag on all multiplayer servers.

Also how do u make sand machines... I thought they got patched in 1.0.0

You can still make them but dont because it lags part of the server(your area) so if you create too much sand then when you'll get close to your base you will crash :3
