

factions dissapearing

Posted by Gimp - 18 Mar 2012 18:12

Randomly factions have been or are being removed. kinda weird, just thought you should know if you didnt already tunes 🤔

Yeah it was mentioned on another post gimp 🤔
(Inventory Resets) Just before you commented.

Well, this is related to inventories and buildings gone somewhere and gp's trashed.

The map runs on a ramdisk along with plugins and all data, to enhance speed like hell 🤔

So this ramdisk was sized to 8Gb, however, someone spammed the generator like nutz during the Saturday night, so the map grown from 7Gb to 8Gb, taking in account it grows around 100mb per day, was there plenty enough.

So the ramdisk filled and corrupted stuff, I do keep some backups and got the server restored to the closest one.

I sent you a PM with your coords. Also, I gave them to Chifilly. Or if you see me online, my /home is still set there and you can /ptp to me.
