

Minecraft server is messed up

Posted by FroggyFace - 15 Jul 2012 15:33

Well i've noticed that besides the torch problem we have we also have a problem with the McMMO plugin, every time you right click to use your ability it never stops. Also the MultiVerse plugin doesn't work. tunes please attempt to fix this and if you can't we could always stop the server untill a solution has been found.

Thank you tunes 😊

Edit: Tunes i had to stop the server because people exploit the McMMO buy to recive levels :S

I'm gonna be "that guy" and go ahead and ask whether there are any time estimations for when TWK will be back up? Also, I've found a benefit [for myself] to the server being down - it's given me some time to do some design work. 😊
