

Permissions

Posted by Postal291 - 16 Aug 2012 15:13

I'm not sure if it's just me or all MOD's.

I can't use /kick or /ban (or any derivative).

These permission nodes are required to fulfill my duties as a MOD.

BTW: Caught player Nerdysib flying around (i was able to kill him while flying 20 blocks up, so there's no doubt). However, I was unable to carry out any punishment.

With the addtions of mcbans, permissions have changed, I'll check them out.
