

MOD Abuse By Postal

Posted by ~Falcon - 28 Nov 2012 02:59

I was in x_iCraft_x's house, which Postal was helping him mine out. I ptped to Craft, not knowing Postal was there, and Postal walked up to me, hit me with a sword, and resumed mining. See as it's a pvp server, and Postal's faction is an enemy of mine, I started attacking him. We fought for about 15 seconds, then Postal turned /god on, and the fighting stopped. See as I had a strength potion and a 588 axe level, and he had regular diamond armour, I'm asuming he was about to die, and used /god to save himself. When I started questioning him, he said accused me of "Attacking a MOD for no reason," and he also said he was just there to help Craft. After pointing out that it was a pvp server and that he was using MOD abilities to save him from dying, he muted me. If you need proof, I have tons of screen shots to prove it. (If you'd explain how to post one). Thank you for your time. In game name: alazyfalcon.

Long story short, I was helping a fellow mod out and didn't have god mode on. I got hit by falcon so I smacked him back. Thought that was the end of it so I continued to mine. Then he potted up, equipped his axe and came at me. So I took the high road and /god instead of slaughtering him. Now he's whining about mod abuse. I asked him to drop it, when he didn't I muted him for 60 seconds.

If I wanted to pvp you would have died falcon. And tomorrow I'm going to show you. Consider this my declaration. /f enemy tomorrow 🤨
. Have a good night.

Postal is probably the least likely to abuse 🤨 but for the future it would probably be better if you killed him 🤨
maybe save god mode for mod situations
