

## Time is Money Machine

Posted by LordChaosMind - 25 Jan 2013 23:26

---

I just logged on about 5:00 central this evening and noticed that both Time is Money Machine's near spawn are broken. Incidentally, the spawn still seems to work properly. 🤔

Thanks.

That's because (I think) Tunes removed the Time is Money plugin, because the new time logger does it automatically (although I've heard it doesn't give money very frequently), but EM should be working fine.

Also Tunes, when you see this, you need to make the joining messages private to the person that joined, no the whole server, because the whole server gets 3 lines of text when people join, and Admins can't join secretly anymore because of it.

Okay, I was on when tunes played with dis :p

Time is money is removed, Replaced by OnTime

It will track your time if your Offline, So I can finally log off and not feel crap 🤔

You get 30 C every 30 minutes automatically.

I like it alot more, Since I always forgot to visit the Time is money every 2 hrs.

Right on Shadow and Chiff, time is money will no longer work on the server, ontime provides A LOT more flexibility and more into the future way how things will work in the server.

I'll check on that Chif!

BTW, if someone would be awesome to remove the cashmachines from spawn and place an sign explaining what happened.

Thanks for the explanation. The plugin seems to be working fine with an update every 30 min. Thanks, Tunes!

I like this Ontime a lot better than time is money. 😊  
But /em still seems not to be working.

/em is working perfectly fine, it just that the infinite buy orders aren't there anymore. I don't know if this is intentional, so I'll leave it until Tunes comments on it
