

Is the server down for maintenance?

Posted by Veniteo - 21 May 2013 20:41

Hello, i recently join your server, and just got accepted into the group/whitelist/whatever, and now i cannot log in to the server. i either refresh and get communications error or cant reach server. in either case i try to join and it gives me the ever annoying read timed out error.. any ideas why my incredibly powerful internet is unable to log in?

Please ignore this, i just got in after numerous attempts.

EDIT: I am however experiencing incredible lag spikes IG, on the order of 15 full seconds of lag. my internet has 0 packetloss and ~18ms ping, so i'm going to say it isn't my internet.

I have no idea what has been going on lately but your not the only one who is being affected. Yesterday the entirety of TWK went down twice for me; that's server, website and teamspeak. Nothing else was affected, just TWK :/
