

## Bukkitcontrib plugin

I encourage for all survival players to install the bukkitcontrib plugin

WHY??!?!?!?

Some plugins on our Survival will use the plugin installed on your client, what for?

Custom mmo level up notifications, custom ability sounds, in the future, capes, hats and stuff alike 🤖

Here's how to get it (automatic installer, but didn't work for me)

The zip with all files, just select all and drag them into the minecraft.jar like you all do with Zombe.

Some server plugins that use the bukkitcontrib

[forums.bukkit.org/threads/bukkitcontrib-plugin-list.26171/](https://forums.bukkit.org/threads/bukkitcontrib-plugin-list.26171/)

However I have installed on the server, I won't make it mandatory (I could, but I believe everyone would be kicked off the server).

I've just tested and works! The mmo levels appear on the top left like the achievements... coool! 🤖

Hmm, sounds like an epic mod, wish it would work for me though, ive tried to install 3 times and it seems to work but when I open minecraft after installing it, i get this:

● **Warning: Spoiler!** Mods loaded: 1  
ModLoader Beta 1.7.3

Minecraft has crashed!

Try to manually install, get the zip, open minecraft.jar in winrar or something, DELETE META-INF and copy all (including directories) into the minecraft.jar root.

Worked for me, and I also have Zombe installed.
