Well tunes already posted the artifact mod (thanks for that tunes but it isnt out yet 🙄)

anyhow onto buisness ive found this mod a while back and im loving it

this singleplayer mod adds npc villages to the game who will trade with you (it adds a whole new currency system to the game) reproduce so the world will become more populated as you play and adds factions (somewhat like the one we got on our SMP) but with npc's you gain reputation as you trade with them. Anyway look at the thread to find out alot more! 🙄
