

recommended plugin for the McMMO server :3

Posted by FroggyFace - 03 Sep 2011 20:10

Archers plugin

Basicly the plugin adds more arrows 🐸

Normal - Shoots one normal arrow

Fire - Shoots a fire arrow

Tnt - Shoots tnt

Thunder - Shoots an arrow that creates a lightning

Monster - Shoots arrows that spawn random monsters

Trice - Shoots 3 arrows

Zombie - Changes the zombie into a giant(Normal zombie but with the giant's skin 🐸)

Tree - Shoots an arrow that creates a tree

Pig - Shoots an arrow that switches pigs into pigmen 🐸

Zeus - Lightning + tnt 🐸

Tp - Shoots an arrow and you teleport to the landing spot

Fly - Shoots an arrow that makes the target fly up into the sky and fall down

Every arrow uses its own ammo, for example you need snow and an arrow to use the "Ice arrows"

If you ask me the only arrows that should be used in the server are the "Trice" and the "Ice" Because they arent Op like the others and they are really nice + Just Check the Permission of the arrows 🐸
