

Virtual chest will go away

Posted by Tunes - 05 Jul 2012 21:13

Well, as the title says, virtualchest, the /gp command, will go away, besides being a PITA to mantain, as discussed with froggy, takes lots of the survival scene away, raiding becomes pointless, as I've been wandering around the map and see bases with NO chests.

This will power the need for players to become more practical with bases, security and so on.

I will be changing how factions drain Crafts and how Crafts are earned too to soften the transition.

Why /gp is pain to maintain?

- I'm not the plugin coder, most of the time, with severe updates, /gp breaks and cannot run or clears people chests or something else really stupid.

SOOOOOOOOOOOOOOOOOOO

clear your chests.

im pretty sure i can remove them from our side until tunes can remove the files if you want

edit-nnnope, i can limit the persons chest number but doing that for everyone would not be worth the hassle 🙄

I haven't removed them yet, work appeared and so... the usual.

But, I'll take a look into the configs, maybe limiting the number of chests is possible.

Or remove the plugin ??

Remove please even having one chest for diamonds and other good stuff will ruind the survival 🙄

Thank you for your time tunes 🙄

Well, I've removed it from the plugins, server still needs a restart, which I won't do now cause it has some players in.

Well, expect lots of kiddies "heeeeeeyyyyy, this server sucks" and so... 🙄

Actaully we reached a new age of players, it happend to us before. We used to have like 15 players playing for a long peroid of time and then instantly new 15 once come in and the old once don't login anymore 🙄

This is what happening to the server right now lots of players stopped playing while we recently got loads of new once who start playing hopefully till the next age of players 🙄
