

Could we add a smart moving plugin?

Posted by PixelHurricane - 06 Apr 2013 23:59

I think it would add a lot of fun and elaboration to the server for those who use it.

I even know a few people who are looking for a server that has a smart move plugin available so it might even bring people in.

We have way too many plugins to add something as elaborate as that, but ultimately it's up to Tunes, but I don't think it would be added

Also, my 1000th post 🥳

Its a bukkit plugins that allows the use of smart moving. it's basically crawling, ledge grabbing, and things like that. as far as i know the installation is fairly simple.
