nah its fine eskimo.

and 'that' was something that happened when i went off for bout an hour and my bro went on...i usually have wcsmenu as my copy/paste and my bro made it a offensive link as hes 18...hes a bit out of control since he works in a bar...soo i accidently copy/pasted a offensive link instead of wcsmenu...

yes i know, likely story, but why would i post a link like that purposefully when im trying to get on to the community, which now is probs never gonna happen. oh well, stuff happens i guess. And now you've probs ruined for me Amitael mind leaving the matter be now....
