

What does your background look like?

Posted by deN - 27 Feb 2011 15:36

Your PC/Laptop background must look like something.. Post yours in here to show off how awesome it is ;D

"How do i get mine here, Reality?"

Go to your keyboard and press printscreen. Then go to paint and paste it in there. Save it something like "iareawesome" and then you have to upload it using imageshack.us/ or photobucket.com/

or u can just add it in the attachments under 📎

mine 📎
