Hey all, Recently stumbled across this server after wondering if there was a CS Source version of WC Mod and here i am, and addicted 😊

Im very new to this WC stuff (pro at cs ofc LOL) so I just popped in to say hello because you'll be seeing alot more of my name on your server 😊

Also wondering if theres any forum threads for newcommers to the community, like with a detailed hero list, commands that help new players and also tips and tricks to getting used to it quickly 😊

If there isnt id be happy to do one once i learn everything 😊

Looking forward to shooting u and then being stabbed in the back by gimp

Dewy
