

fun maps for all of the twk servers!

Posted by crazyjack - 16 Aug 2011 12:42

hey guys, erm i have been making some remkaes of call of duty maps... but it was getting a little inoying so i started looking for COD maps to download and i came across:

NukeTown from Black Opps (go to www.mediafire.com/?loh1j6kmlnfrz44 to download the map and have a look)

There are some cool things about the map, including a care package which drops each round and gives you different guddies each round. but you have to be the first person to get the package where ever it lands. there is also a 1 in 6 chance of getting a chopper gunner in the map XD or an air strike.

Rust from MW2 (go to www.gamebanana.com/maps/download/134098 to download the map, click the top download)

The Rust map is an all time favourite MW2 map, Which i think every1 likes. It is very realistic enough to the real map and the size of the map is also proportional. In the map, the glitches have also been added except they r not glitches but secret ladders 😊

Terminal from MW2 (go to www.gamebanana.com/maps/download/147225 to download the map. again click the top download)

I think that Terminal is a perfect size map and isnt to big or small. Its nicely and bright sunny and again is looks very in proportion to the real map.

Scrapyard from MW2 (go to www.gamebanana.com/maps/download/158011 tod ownload and click the top download)

Scrapyar is an all time favourite map of mine. It is a good size map for all to play on and is again, very realistic and is in proportion to the real map! 😊

De_Asia (go to www.gamebanana.com/maps/download/93482 to download and lcick teh top one)

This is not a caal of duty map but i found this map when searching for remakes of cod maps. i think this map will suit the server as there is lots of different ways around the map and the map is not to small, and not to big. 🤔

🤔

can these maps be added to the twk warcraft server plzz 🤔

Doesn't mean others won't vote for them though 🤔
Plus how will you know if they aren't good you don't try them 🤔

I didn't say anything about you not trying to game 🤔
Don't get mad I ain't done anything wrong. But the maps won't be exactly the same and plus you are playing the map on a different game so it might be fun 🤔
