

Source Bans.....

Posted by S2K Sp!ke - 02 Sep 2011 14:14

Hi guys, i tried to submit a ban the other day for a player named Swampen Davy J on the Gungame DM server but sourcebans wasnt working, check it out for yourselves....

Anyway, really like your server! Cheers.

You kidding me right? I tried to talk to you with hlsw the other day when you were online but you just ignored me, i even said it in menuchat so you would notice while playing gungame. I asked if you had a demo, and thats still my question.

Colin: Its at ban submissions

PS: Welcome to the forums ^^

ah yeah found it/them lol.

sry no demo no proof etc.

I don't have a demo of the guy as i have no capture software atm, i was suggesting you check the guy out....

He also lags like hell as do a few others, the server could do with a high-ping kicker. i have seen that Swampen Davy J guys ping averaging 160ms, sorta gives him an advantage over people with a good connection....

Just my thoughts, i used to run my own server S2K UK and it had a ping kicker to keep things fair, coz lagers have an unfair advantage as they lump across the screen.

Yeah i saw the console message but i accidentally closed the window :/

Cheers, Spike.

yoou dont need capture software steam has its own demoing.

to record via steam open console type in record minus the

it will record a pov of what you see so once you record folow the guy in spec mode or when youre dead then when you want to stop just type in stop in console.

the demo will be saved to the cstrike folder i belive.
