Well,

i had enough of couterstrike a few months ago,

so I quitted, as i know, in the past i did a few mistakes, which i wont do again,

i hope you guys wont be angry on me for that mistake,

I made this new account because:

i can't log on the previous one anymore, has it been banned? or deleted, i realy don't know,

first of all, i will be active again on the servers and the forum,

second, i still have my 2 or 3 word documents were are 2 or 3 scrypted races i made,

those haven't been tested yet on the testserver,

i have the password etc but the wcs is down there already a long time i guess,

but Mentoz let me remember Liquid snake has a program to make a kinda LAN server for free, were i can test my races,

so Liquid snaken, i would really praise u if u would send me the download link for the server and the wcs mod 😊

Greetings,

Matthias
